Thanks Amy. Attached is a document showing some of the public comments regarding landslides. You will notice that the only group providing references was NWEA. You could start with those references – primarily NWEA. The other two documents also have landslide references (primarily from the State) that you could begin looking at next. It would be good to drop these all into a table along the lines that Alan shared with us. I am hoping to get the OFIC comments with highlighted landslide references later today or tomorrow and will also share that.

Please let me know if you have any questions. Maybe we could touch base on Monday, regardless....

Thanks.

Hi Chris,
It was nice connecting with you all yesterday on the OR CZARA project. I am getting organized with information on the references so we can get off to a quick start and try to provide something useful for your call on the landslides comments next week.

I believe you mentioned a list of comments or letters associated with the landslide comments. If you have that handy, can you please send it along? Otherwise, I will compile a list from the “coded public comments” spreadsheet and run it by you.
Thanks, Amy
